Genuine Case IH Parts: Designed for the Perfect Fit.

The **Partstore** has everything you need to keep your equipment up and running. Now you can easily store your machine models to access parts with **My Shed** and **My Shed Mobile App, 2.1.** My Shed offers:

- **Machine Management:** Enter serial number, hours and notes
- **Parts Manuals:** Access assembly diagrams and create part pick lists
- **24/7 Dealer Connection:** Email part pick lists to a dealer
- **Toolboxes:** Oil/fluid selector and battery finder
- **Machine Info:** Product alerts and videos

CUTTING PARTS FOR TODAY'S DEMANDING APPLICATIONS

Case IH Original Equipment Cutting Parts are designed and manufactured for the finest agricultural harvesting equipment available today. Whether for the Case IH Mower, Mower-Conditioner, Windrower or Combine Header, we've designed knife sections and knife assemblies to go the distance and meet today's demanding cutting applications.

EXPLANATION OF ABBREVIATIONS

| Abbreviation | Description |
|--------------|---|
| REG | Regular Thickness – 14 Gauge Material |
| HVY | Heavy Thickness – 12 Gauge Material |
| XHVY | Extra-Heavy Thickness – 11 Gauge Material |
| SS | Sta-Sharp™ Serration Profile – see page 5 |
| SSS | Super Sta-Sharp™ Serration Profile – see page 5 |
| BL | Black Knife Section Finish |
| PL | Plated Knife Section Finish |
| SM | Smooth Knife Section |

| Abbreviation | Description |
|---|------------------------------------|
| US | Under-Serrated Knife Section |
| TS | Top-Serrated Knife Section |
| HDLS | Headless Knife Assembly |
| LH | Left-Hand Side |
| RH | Right-Hand Side |
| EXT | Extension |
| DBL | Double Point Section – 1-1/2" Cut |
|  | Original Factory-Equipped Assembly |

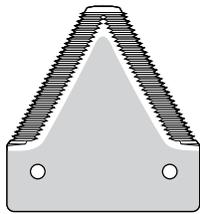

CASE IH ORIGINAL EQUIPMENT CUTTING PARTS

Case IH Knife Sections

Tough, Break Resistant Material

All Case IH Knife Sections are manufactured from C1080 – a tough, high carbon material that conforms to ANSI Standards. The cutting edge is induction hardened and tempered to Rockwell C 49-54 for maximum wear resistance. The center of the section remains a more ductile Rockwell C 25 rating to resist breakage. Serrations are coined (formed with the knife in a single process) for maximum consistency and are perpendicular to the center line for improved self-sharpening and cleaning action.

Knife edge is heat treated to RC 49–54 for long life.

Knife body (shaded area) is heat treated to RC 25 for break resistance.

Three Knife Styles for a Wide Range of Applications

Smooth for light grasses and special applications. Can be resharpened as needed. Available in black or chrome finishes.

Under-serrated for general cutting applications. Can be resharpened as needed. Aggressive serrations grab and hold the stem of the crop. Available in black or chrome finishes.

Top-serrated the self-sharpening knife section for combine and most hay cutting applications. Unique design enables these sections to self-sharpen in the field while the machine is operating, reducing downtime. Outlasts conventional knife sections four to one. Case IH Top-serrated knives come in three versions — Standard, STA-SHARP™ and SUPER STA-SHARP™ knives. Top-serrated knives are available in three options – 13, 9 and 7 serrations per inch. STA-SHARP Knives are recommended for general cutting applications. SUPER STA-SHARP knives, with their more aggressive serrations, are ideal for larger, dry stem crops, such as alfalfa, soy beans and cereal grains.

Smooth

Under-serrated

Top-serrated

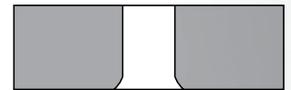

Case IH Knife Assemblies

Case IH Knife Assemblies are available in an easy-to-maintain bolted version, or the traditional riveted version. Knifebacks are made of high carbon material with a fine grain structure for optimum tensile strength. To guard against premature wear and loose sections, fastener holes are drilled, not punched, leaving a straight hole with no breakout.

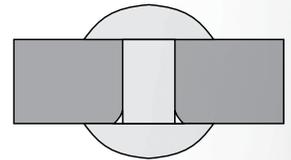

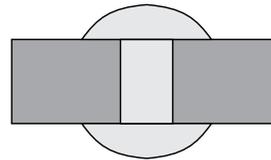

Split Knife Assemblies and Segments are available to provide easier shipping and handling from warehouse to dealership to field. The lengths of the segments allow shipments to be made on most popular courier services, speeding up the replacement of knife assemblies that require repair. Split Kits are available for use as replacement splices or repair kits.

Drilled holes are smooth and straight, holding the rivet securely in place.

Punched holes flare out at the bottom, allowing the rivet to rock its way loose.

WE OWN THE CUTTING EDGE

Case IH Mower Knives are superb quality Disc Mower Knives. They boast a number of design features that help them cut smoother, last longer and operate more safely than other knives. Furthermore, each and every production lot is subjected to a rigorous battery of tests to ensure performance standards are met. Each knife bears a stamped Traceable Sequential Lot Number, a unique number that permits tracing the knife back through all of its manufacturing processes.

Manufactured for Maximum Performance

From raw material specification to the last production process, extra care has been taken to assure optimum performance and durability.

- The cutting edge is milled, not rolled, for improved sharpness. The milled edge does not extend past the bolt holes, for increased strength.
- The new, radial-twist design improves lifting action for a smoother cut.
- Disc Knives are austempered for better impact absorption.
- Knives are available in 3, 4 or 5 mm thicknesses with bevel-up, bevel-down or bevel-opposite knife styles.

Traceable Sequential Numbering System Confirms Our Commitment to Do It Right

Every production lot is tested against ISO specifications, then the manufacturing and testing processes are verified by stamping a traceable sequential number on each knife. In addition, tests are performed to satisfy standards set by Case IH – standards that exceed ISO requirements.

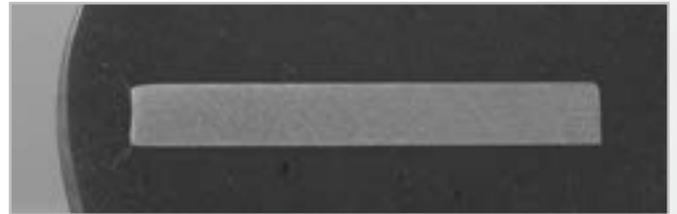

- Incoming material is inspected, then tagged for traceability.
- Bend tests are performed to guard against cracking.
- Impact tests are used to check structural integrity.
- Cross section analysis assures optimum metallurgical grain structure.

Our Disc Mower Knives are manufactured in three thicknesses for light, medium and heavy-duty applications.

The new radial-twist design extends down and across the central area of the blade for better lifting action. For more information on rotary disc mower knives, refer to PM-13728.

Cross sections are examined under a microscope for proper grain pattern.

Bend tests are performed on each production lot to determine if cracks are present.

Impact tests check the knives' ability to flex and absorb shock and not shatter into pieces should they hit obstructions.

DISC MOWER KNIVES

ROTARY DISC MOWER BLADE SELECTION

7° TWIST KNIVES DEPOT

The 7° twist knives are recommended for abrasive soil and rocky crop cutting conditions. These knives function well in a wide range of field and cutting conditions.

| PART NUMBER | DESCRIPTION/TYPE PITCH/ROTATION |
|-------------|---------------------------------|
| 9847683 | Knife – 7° Twist CW |
| 9847684 | Knife – 7° Twist CCW |

14° TWIST KNIVES (STANDARD EQUIPMENT) & 14° TWIST SERRATED KNIVES DEPOT

The 14° twist knives are recommended for most crop conditions. The greater twist angle enables the knife's cutting edge to cut closer to the ground and provide more lifting action to move the crop over the cutter bar into the conditioner, producing a cleaner cut. The greater twist angle in these knives makes them more susceptible to rock damage.

SERRATED

| PART NUMBER | DESCRIPTION/TYPE PITCH/ROTATION |
|-------------|---------------------------------|
| 86621872 | Knife – 14° Twist CW |
| 86621873 | Knife – 14° Twist CCW |
| 87029587 | Knife – 14° Twist OS CW |
| 87029588 | Knife – 14° Twist OS CCW |

18° KNIVES DEPOT

The 18° twist knives are standard on RD163 and RD193 self-propelled windrower heads. The 18° twist provides for a close cut and high lift for superior material flow.

| PART NUMBER | DESCRIPTION/TYPE PITCH/ROTATION |
|-------------|---------------------------------|
| 84271203 | Knife – 18° Twist CW |
| 84271205 | Knife – 18° Twist CCW |

7° KNIVES DEPOT

The 7° twist knives are available for the RD163 and RD193 self-propelled windrower heads. These knives function well in a variety of crop conditions and are less susceptible to rock damage.

| PART NUMBER | DESCRIPTION/TYPE PITCH/ROTATION |
|-------------|---------------------------------|
| 84343225 | Knife – 7° Twist CW |
| 84343226 | Knife – 7° Twist CCW |

“V” KNIVES DEPOT

The “V” knives are recommended for operation in rocky conditions where excessive knife bending is a concern. This style knife has greater resistance to bending when coming in contact with a foreign object. The cutting quality of this knife is not as good compared to the twisted knives.

STANDARD

“V” FOR ROCKY CONDITIONS

LIGHTEN UP.

**EXTEND THE WORK DAY—SAFELY—WITH LED LIGHTS
FROM YOUR CASE IH DEALER.**

When you switch to LED, superior visibility isn't the only bright spot. In fact, one LED light can outlive more than 20 HID lights, saving time, money and hassle.

Visit BeRedandReady.com/LED to learn more about the advantages of LED.

IT'S NOT REBUILT. IT'S REBORN.

CASE IH REMANUFACTURED PARTS. MORE RELIABLE
THAN A REBUILD. MORE PRECISE THAN A WILL-FIT.

To maximize uptime and keep your equipment running at peak performance, choose Case IH remanufactured parts. Case IH delivers engineered components that aren't just close to OEM specs, they are OEM specs. In fact, they even come with a warranty that's equal to or better than the competition. With Case IH remanufactured parts, you'll get maximum performance from your equipment and more money in your pocket.

KEEP THE UNEXPECTED FROM IMPACTING YOUR PRODUCTION.

Run your operation longer and stronger with a Shock Protection System Hub Kit. When your mower's blades come into contact with rocks, branches or other obstacles, the stress can damage your mower modules. These easy-to-install shock hubs minimize spline shear and eliminate cutter bar gear teeth failure if an obstacle is encountered. This cutting and baling season, Be Ready for the unexpected.

SHOCK PROTECTION SYSTEM HUB RETROFIT KIT

Part No. 87602273

The Shock Protection System Hub Retrofit Kit allows you to retrofit older-model mower conditioners. It includes a hub seal which prevents metal fines from entering module components and damaging them. Components and installation instructions are included for two modules.

Application: DCX91, DCX101, DCX131, DCX161, MDX71, MDX81, MDX91, RDX131, RDX161, RDX181

SHOCK PROTECTION SYSTEM HUB REPAIR KIT

Part No. 87580643

The Shock Protection System Hub Repair Kit makes in-field repairs fast and easy. Components and installation instructions are included for one module.

Application: All models except RD163, RD193

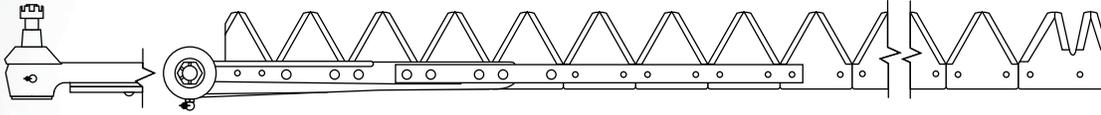

For more information, see your local Case IH dealer or visit partstore.caseih.com today.

*With Section Reinforcing Straps.

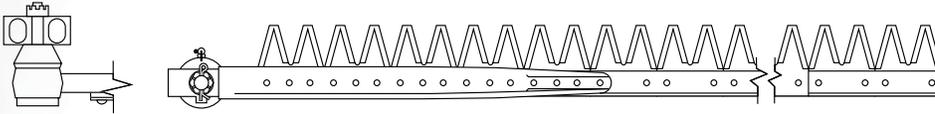

Note: Order both center segments for 30 ft assembly.

- Split knives reduce the potential for freight damage due to their shorter lengths.
- Split knives increase the ease of shipments by using small package carriers.
- Split knives can be assembled in the field in an average of 20 minutes, offsetting the amount of time it takes to strap a one piece knife to your vehicle.

SECTION REINFORCING STRAP KIT

| CASE IH PART NO. | DEPOT | DIRECT SHIP | DESCRIPTION | KIT CONTENTS |
|------------------|-------|-------------|--|-----------------------------------|
| 321849A2 | — | X | Section reinforcing strap and hardware kit | 100 Nuts, 100 Bolts and 50 Straps |
| 321848A1 | X | — | Section reinforcing straps | 25 pcs. |

REPLACEMENT SPLICE/REPAIR KITS FOR SPLIT KNIFE ASSEMBLIES

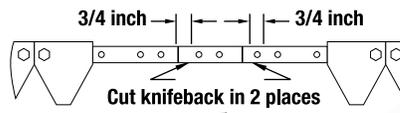

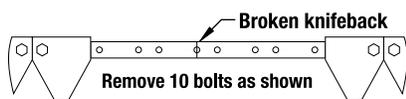

(For 3" Knife Systems Only)

| CASE IH PART NO. | DEPOT | DIRECT SHIP | DESCRIPTION | KIT CONTENTS |
|------------------|-------|-------------|---|--|
| 371658A1 | X | X | Splice Kit for assemblies with 2-1/16" hole spacing for Case IH application | 1 instruction card 1 allen wrench Hardware |
| B92973 | X | X | Splice Kit for assemblies with 2-1/8" hole spacing | 1 instruction card 1 allen wrench Hardware |
| 84585647 | X | X | Splice Kit for assemblies with 2-1/16" hole spacing metric hardware | 1 instruction card 1 allen wrench Hardware |

Note: Not for use on 810 Case Headers or any knife assembly with knifeback on top of section.
Air tools are not recommended for assembly of splice kit.

FOLLOW THESE RECOMMENDED INSTRUCTIONS TO REPAIR A BROKEN SICKLE

Split Kit will mend most broken sickles. Breaks near the head of the sickle can be moved to the tail end with Split Kit. Some drilling may be required to mount the knifehead in new positions.

Case IH dealer or visit partstore.caseih.com.**

Safety never hurts![™] Always read the Operator's Manual before operating any equipment. Inspect equipment before using it, and be sure it is operating properly. Follow the product safety signs, and use any safety features provided.

Specifications, descriptions and illustrative material herein are as accurate as known at time of publication, but are subject to changes without notice. Availability of some models and equipment builds varies according to the country in which the equipment is used.

CNH Industrial America LLC reserves the right to make improvements in design and changes in specification at any time without notice and without incurring any obligation to install them on units previously sold.
